THE INTEGRATION OF BUSINESS AND TECHNOLOGY

SOFTWARE SOLUTIONS

FOR YOUR BUSINESS

With a decade of software solution experience behind us, we build end-to-end solutions that are scalable, dependable and robust. We have the capabilities to support virtually every type of application, from legacy database systems to web-based, customized software and off-the-shelf IT solutions.

SYSTEMS INTEGRATION

Technical Expertise in Systems Integration

Today, we are fully integrated into our customers' business by providing them with wide spectrum of solutions.

We have in-depth knowledge and experience in network architectures as well as in security implementation, therefore ensuring a reliable platform for businesses to perform everyday tasks.

Our services cover Project Management, System Analysis, Infrastructure Consultancy, ICT Deployment & Management, System Maintenance, System Upgrades, and Security Audit and Management.

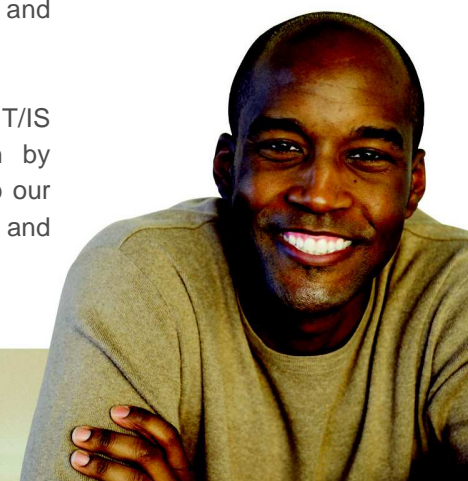

SERVICE & SUPPORT

With a global focus and deployment, we have satisfied customers from various sectors such as multinational companies, locally listed companies, government organisations, education institutions, small and medium businesses and non-profit organizations. Biz-Era is committed to helping businesses raise profit objectives by reducing cost and realigning business processes by leveraging on technology.

"We Don't Just Develop Software Solutions, We Support Them Throughout Their Lifecycle."

We offer the flexibility of providing tailored packages for specific needs. Our pool of dedicated staff are ready to support operations across a wide spectrum of computer platforms using different operating system such as Windows, Unix, Linux and Macintosh.

Biz-Era provides this special function of IT/IS department within our clients' organization by providing various IT and network engineers to our clients. We offer tremendous value with online and onsite support.

WEB DEVELOPMENT

Custom Development of e-Commerce and e-Business Software Solutions

BizzPoint is Retail Management System that not only provides cash collection but also integrates a full inventory control system and customer management system in one powerful system. Browser driven, BizzPoint supports a fully centralised database with many distributed clients providing realtime sales and management reporting.

BizzCRM is a Customer Relationship Management Solution based on Microsoft platform to give you the quality relationship management that you need to make better business decisions with a clear view of your customers. The system features full Sales, eCampaign and Marketing Modules that links to backend Inventory Management, Financial Reporting and Management Reporting.

Biz-Era brings affordable eCommerce & eBusiness to various industries such as retail, wellness & healthcare, food & beverage, field service and distribution.
